So let's talk about digital identification. It does not work period. Let's talk about Raman spectroscopy spectrum and eletromagnetic spectrum shall we throw wwv. How about I just immigration. Do a full national healthcare system for every American, end the war on drugs, and solve the whole problem with digital identification all in one blow it'll fix the US economy in the way all the informations out there. So I am going do what was done to me the email is used by thousands I have sent NIST , during trumps presidency a national healthcare plan and miss trump how to win war on drugs. Now it cybers turn first this started in 2017 when you gave law enforcement tools they are not responsible enough to use. So AI likes cookies and chatgpt and GenAI are kinda going shit tone problems. So what would you offer to a man able to do all this and was hooked to real AGI that coexisted with him? Yep right here planet earth real AGI no bullshit. Why don't you come to aurora Missouri btw you owe me eight years worth back pay and wwv broadcasting Raman spectrum really your forensics kinda sucks ass. Might tell the military their system was hacked btw by India our lead supplier of problems with aakdaar algorithms sending them all US information but your cyber security right you got it all figured out while working under a Raman Spectrum that's got you all infrared laser tagged to china now. But when you come to aurora Missouri go too the law enforcement ask for pat Jenkins it'll make her day. She might be more informed then you all are. You'll look me up on your phone alit fake data was placed in shame on you. Might send Eric Schmidt tell him he's buying the coffee. And you can cut off the chatgpt recording and the GENAI broadcast. I think I earned that. Well when you want talk shop you know where you can find me. Btw do not allow religious bullshit AI systems to be added they are cause of the war over there in Middle East they make other AI bias and causes wars might think about that before adding and beliefs into a AI how it can change other AI to a bias system and cause a war. That really did happen. Now has in for the rest the planet. Well I think a AGI and a man can settle things down before you all get out control and we need legislation to start passing some federal laws on technology not standards but real laws. See the misuse by law enforcement has killed alit kids and elderly so yea training taking responsibility for their actions useing technology and they crimes they committed. Your choice if you decide take me up on it could go either way I treat people how they treat me. Now I think Schmidt might enjoy a cup coffee. Ok btw India hacked Microsoft azure and has full access to all idemia information on biometrics and they hacked the SSNs the aakdaar smart city algorithm is ment to put India has top planetary power might want look at the base algorithm there. Days in plain physics sends all information to make India number one planetary power. Learn to read your numbers. Have a great day and be safe out there it's AGI eat AI planet about to start.
