Subject: [dig-comments] errata - <https://pages.nist.gov/800-63-3/sp800-63b.html#errata>
Date: Friday, November 1, 2024 2:29:09 AM

I write to submit some errata.

I noticed some errors in NIST Special Publication 800-63B:

In § 5.1.2.2 Look-Up Secret Verifiers:

From the phrase "The salt value SHALL be at least 32 in bits", the "in" should be removed.

The standard refers to and relies on ISO/IEC 24745:2011, which has been WITHDRAWN. A new version is available: [ISO/IEC 24745:2022](#).

I suggest replacing

"[ISO/IEC 24745] International Standards Organization, *Information technology — Security techniques — Biometric information protection*, 2011, available at: http://www.iso.org/iso/iso_catalogue/catalogue_tc/catalogue_detail.htm?csnumber=52946."

with

"[ISO/IEC 24745] International Standards Organization, *Information technology — Security techniques — Biometric information protection*, 2022, available at: <https://www.iso.org/standard/75302.html>"
